

Vision 4

BIM: MUCH MORE THAN BUILDING INFORMATION MODELLING

How can BIM add value to your business model?

Vision 4 Ltd is a leading Business Strategy Consultant, specialising in Building and Facilities Management. It has expert capability in BIM, looking at the value of BIM in the project lifecycle, designing BIM to support your business needs.

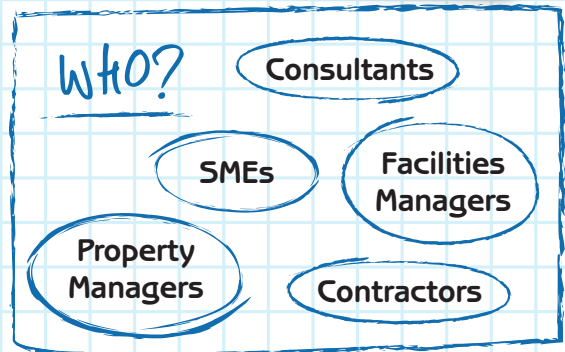

Why BIM?

It adds value equally to all stages of the project lifecycle
It links management strategy into effective design and build capability
It focuses on the needs of the end users.
BIM is a strategic concept supported by a range of design tools

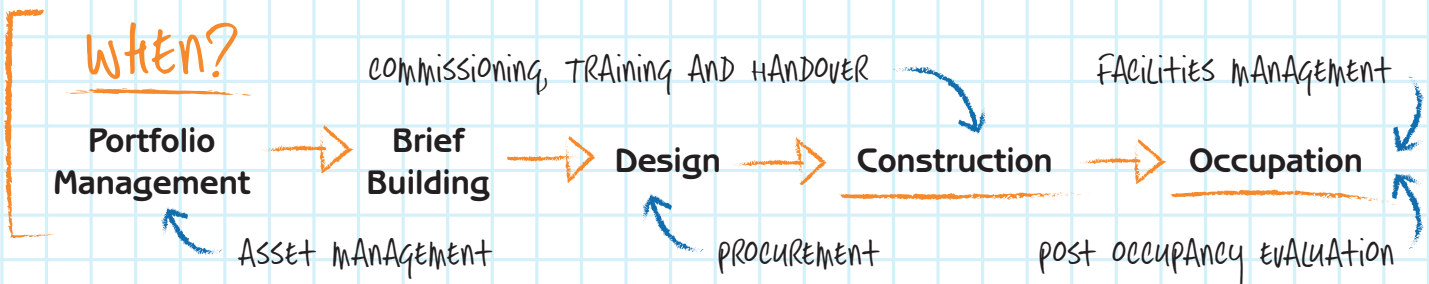

BIM embraces the following:

- Process Design
- Data Management
- Visualisation

Who?

When?

Adding value to your business:

- BIM by design, being at the forefront of industry best practice
- Clear BIM capability and objectives
- Increased efficiency
- Less waste
- Increased capacity
- BIM integration into the full project lifecycle

Why Vision 4?

- 25 years experience in Building and Facilities Management
- V4 is focussed on bringing BIM excellence into your business, taking BIM from a strategic level into full implementation capability.
- V4 is working at the forefront of the industry, working direct with the Government in BIM implementation through the BIM Task Group (part of BIS).
- V4 has extensive links into BIM knowledge, databases and organisations leading the way in BIM strategy.

Vision 4 offers a suite of products, designed to meet your business needs:

Core BIM

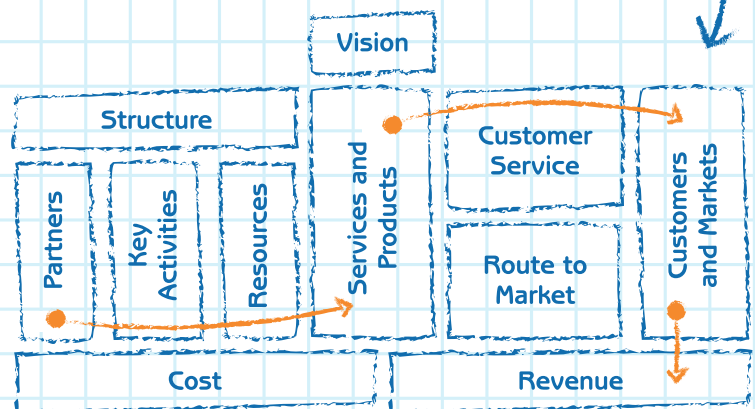

Looking at the overall potential for BIM in your business, supporting development through to full implementation.

BIM+
